

Real-time Analytics providing Insights, Visualization & Dashboard for faster Decision Making

Business Challenge:

- Client is a leading international mining company with operations worldwide.
- The organization's existing reporting requirements was addressed largely by ERP suites, PeopleSoft and SAP. The existing reporting environment could not satisfy the enterprise HR and Supply Chain needs in analyzing various domain areas like compensation, benefits, payroll and safety, Inventory, Stock-in Transit, etc.
- Reporting out of the ERP suites (People Soft, SAP) resulted in resource contention and performance degradation

Solution:

- Assessed current IT environment, including PeopleSoft and SAP (PeopleSoft replaced by SAP later) and set a strategic roadmap for building EDW
- Developed reports for HCM, Supply Chain, Plant Maintenance, Finance and Sales
- Implemented Hadoop (Hortonworks) to enhance data management, reduce TCO, and improve efficiencies.
- Analyzed GPS data from mining equipment for asset utilization and optimization.
- Used Hexaware's pre-built frameworks for accelerated deployment.
- Maintained base rules and customizations for country-specific requirements and Master Data maintenance.

40%

Decrease in the HR Analytics solution effort through Hexaware's Pre-Built Logical Data Model/Framework

Faster
Turn-around

For new users by Increase in throughput of service requests on a monthly basis

Unified view

of organization information by Integrated data warehouse using tools DART, BIMA
