

# Mining Business Value through Accelerated Cloud Transformation

600+ haul trucks | 200+ sensors per truck |  
Streaming petabytes of data from 12+ global sites

Adopted a consulting-led assessment driven approach to help optimize decision making across every step of the value chain, in predicting failure points, capturing inefficiencies, and managing costs and profitability.

Leveraged Hexaware's Amaze to transition from Teradata and Hadoop to Snowflake. This enabled real-time data analytics which was used to optimize equipment uptime, utilization and process productivity.

Remote Monitoring and Diagnostics of moving assets (trucks, excavators, conveyors) using sensor data. Advanced Operational Intelligence through IoT and Big Data analytics.

Worker safety enhancement through driver fatigue analysis, safety compliance and increasing compliance with Safe Operating Practices (SOP) to prevent accidents

**\$5.2M**

Estimated savings  
by preventive  
maintenance

**\$1.2M**

Estimated savings  
by preventing  
excessive idling

**90%**

Reduction in safety  
non-compliance

**50%**  
Reduction in  
equipment idle time
